Manifold Features

**DIMENSIONAL DATA**

2" ANSI Class 2500 Manifold Shown ( Assy. Number MAN-RC-018A)
Other Sizes, Pressures, & End Connections Available

**Advantages Over Comparable Plug Valve Manifolds**
- "Bubble tight" sealing without the use of lubricant
- Less expensive
- Lower repair kit costs
- Less than half the weight

**Piper Features**
- All Piper valves are designed for dirty fluid service.
- Tees, crosses, valves, and nipples have matching bore sizes providing a "through conduit" manifold design for optimum flow.
- Building block design allows a wide variety of connection options and manifold configurations.
- Face seal connections require almost no line spread to remove a component.
